PROFILE

Motivated 23-year-old female Bachelor of Science Honours student in Cloud Computing and Internet of Things at the University of Zimbabwe. Developing strong practical skills in cloud-based systems, software development, IoT prototyping, databases, and artificial intelligence. Experienced in leading academic and personal projects including e-commerce web development and Azure IoT work, with a collaborative approach to building useful technology solutions. Holds a valid driver's license and is committed to continuous learning, teamwork, and practical problem-solving.

EDUCATION

BSc Honours - Cloud Computing & Internet of Things

University of Zimbabwe | Academic Year 2 | 2026 Semester 2

Advanced Level

Maranatha Christian High School, Zimbabwe | Completed 2022

3 passes in Mathematics, Physics and Biology

Ordinary Level

Washington Hills High School, Zimbabwe | Completed 2020

9 passes including Mathematics and English

CERTIFICATIONS

CS50's Introduction to Artificial Intelligence with Python

Harvard University / CS50 | 2025

- Completed twelve AI projects as part of the course curriculum

TECHNICAL SKILLS

Languages: Python · Java · JavaScript

Web: HTML · CSS · React · Node.js

Cloud & IoT: Azure Cloud Services · Arduino · Raspberry Pi

Data: MySQL & Database Design · Jupyter Notebooks

Other: Object-Oriented Programming · Web & Mobile Computing · Software Engineering

PROJECTS

Genzee E-Commerce Web Application | Lead Developer

Web Application Project

- Led development of a functional e-commerce web application to support store-owner operations and online product management.
- Built core features using React, Node.js, JavaScript, HTML, CSS, and MySQL.
- Coordinated project direction, code structure, testing, and feature planning while preparing the system for future deployment.

Azure IoT Project | Lead Developer

Cloud and IoT Project

- Led an IoT-focused project applying Azure cloud concepts and connected-device workflows.
- Applied sensor integration and cloud-dashboard thinking for real-time data collection and monitoring.
- Used Arduino, Raspberry Pi, Python, and Azure-oriented services throughout the project.

FairWatt - Smart Sub-Metering & Energy Dispute Resolution | Group Collaborator

IoT Project

- Collaborated on an IoT-based smart sub-metering solution for multi-tenant households.
- Contributed to system design discussions around energy monitoring, tenant usage tracking, and dispute resolution.
- Strengthened teamwork, technical communication, and documentation skills through collaborative work.

ACADEMIC PERFORMANCE HIGHLIGHTS

- Achieved Class 1 in: Object-Oriented Programming, Machine Learning, Electrical & Electronic Principles, Web & Mobile Computing, Information & Digital Skills, Discrete Mathematics, and Critical Consciousness & Life Skills.

- Passed all computing modules including Artificial Intelligence & Expert Systems, Software Engineering, Data Communications & Computer Networks, Database Design & Development, and Data Structures & Algorithms.
- Completed foundation modules in Programming Fundamentals, Calculus, Linear Algebra, and Statistics for Computer Science.

LANGUAGES

English - Fluent | French - Intermediate | Portuguese - Basic

STRENGTHS & PERSONAL ATTRIBUTES

Leadership · Team Collaboration · Problem-Solving · Communication · Adaptability · Fast Learner · Hardworking · Self-motivated · Responsible · Creative Thinker · Reliable · Eager to Learn

INTERESTS

Cloud deployment · IoT systems · Artificial intelligence · Full-stack web development · Databases · Practical technology solutions for businesses and communities
